USE IT.

LIST OF TOOLS

Connect IT.

WiFi Network Access

1. Choose a network from the available list. Your device will then prompt you to log in to the network. Use the password provided in the room to gain access.

2. If you encounter a password issue, contact IT Support, and we'll assist you as soon as possible.

SECURE IT.

- **Passwords** : Never share your password. Use a password of at least ten characters and try using a pass phrase. Don't use the same password on multiple sites. Keep your passwords secret.
- **Two-Factor** : Two-factor authentication enhances the security of your online accounts by using your smartphone to verify your identity. The university will never ask you for your login, or passwords, or other personal information.
- **Personal Devices** : Recommendations for securing your personally owned device. Use a supported Operating System. Enable Automatic Software Updates. Install University Anti-Malware software (free for students/faculty).
